Beauty around the world

Do you like beautiful ladies? I think most of you like them. There are many beautiful ladies in the world. In Japan, there are Satomi Ishihara, Suzu Hirose, Kanna Hashimoto, and so on. Therefore we want to be like them and were striving to be as beautiful as possible. Conditions of beauty are different by country. So, I'll explain the conditions for beauty in four countries.

First is Japanese beauty. They have white skin, small face, big eyes and slender figures. Like her, so Japanese women try to be slender.

Second is Chinese beauty. Just like Japan, Chinese women try to be slender. Some women's knees are the same width as an iPhone.

Next, for women in Africa like Cote d'Ivoire on Senegal, it is said that women who are plump, and have a big bottom are beautiful. So women in Africa use medicine to make their bottom bigger. This is the medicine.

And surprisingly, Tajikistan's beauty's condition is having a mono-brow! But so far the reason hasn't been traced. According to one theory, Tajikistan's women have a custom of connecting their eyebrows when they get married. Therefore in some areas. It is forbidden to shave the hair on their faces. They use herbs to their eyebrows connected. In this way, beauty's conditions are different by countries. There are many conditions for beauty around the world, but one things I can say for sure is.

“Everyone is different, everyone is special.”

Thank you for listening.
