

# Super Science Special Course (Beachcombing)

As a part of the 1<sup>st</sup> grader's optional class "Super Science Special Course" on October 9th, 35 students carried out "Beachcombing" at Omorihama in Hakodate. Students could understand what kinds of garbage float into Hakodate Bay. The students separated garbage according to type, such as plastic products and cans.

They could understand the present condition of Omorihama and realize that seawater has eroded Omori beach.
